Technical Specfication

Input:	15V/1A
Output:	5V/2A;5V/1A;19V/3.5A;12V/10A
Capacity:	15000mAh
Start Current:	300A
Peak Current:	600A
Size:	157*75*36(mm)
Weight:	540g
Operating Temp.	-20℃～60℃/-4℉~140℉
Lifetime	>1000 cycles
Full Charging Time:	5 Hours

Trouble Shooting

Finding	Cause	Remedies
GOOLOO GP37 is still not full charged while its 5 indicator lights are solid.	60% Charging for longer storage when no usage.	Unplug the adapter and plug it again.
No response when pressing the switch button.	Low voltage protection is started.	Plug the adapter into 15V/1A input port to activate the device.

FAQ

Q1: What cars are GOOLOO® GP37 compatible with?
A: Gas engines up to 6.5L/V8 or diesel engines up to 5.5L.

Q2: What is GOOLOO® GP37 operating temperature and how to store it?
A:The car jump starter GOOLOO® GP37 is lithium-ion, operating temperature is -20~60℃/-4~140 ℉, if the ambient temperature is higher than 60℃/140 ℉, the internal instruction of lithium-ion cells will be changed, it may swell and will be unsafe. So DO NOT store it in car for long time, especially in summer.

Q3: How to jump start a car with GP37?
A:1). Make sure it is over 60% charged. If have not use it more than two months, should charge it first.
2). Turn on it and connect the red clamp to "+", the black clamp to "-" end of the car battery.
3). When the jump cable indicator turns green (make sure), start your car.
4). If the jumper cable indicator does not turn green, turn on the car headlight and wait the indicator turns green, try again to

9

---

start the car.
5). Unplug the jumper cables from the jump starter within 30 seconds, and remove the clamps from your car battery.

Q4: What is the correctly connected of the GP37 and the car?
A: When the clamps connected to car battery, the jumper cable indicator light shines a steady green light, is the correctly connected. If the light flash red, it's wrong connected.

Q5: What should I do if GOOLOO® GP37 cannot start a car?
A: Recharge and fully charged it, try it again, make sure to wait 10 seconds between each jump attempt. If it still not works, email us: fiona@gooloo.co, or contactus@gooloobox.com, within 18 months warranty period (Attach your order ID, it is necessary)

Q6: What should I do if the GOOLOO® GP37 cannot be charged?
A: Charge it with both a 15V wall charger and car charger, wait for about while night. If it still not works, email us: fiona@gooloo.co, or contactus@gooloobox.com,

10

---

within 18 months warranty period (Attach your order ID, it is necessary)

Q7: What should I do if GOOLOO® GP37 cannot charge other devices?
A: Using a different charging cable to charge again, if it can work, must the cable defective, email us we will provide you a new cable, if is still not work, email us: fiona@gooloo.co, or contactus@gooloobox.com, within 18 months warranty period (Attach your order ID, it is necessary)

Q8: Can the GOOLOO® GP37 charge other devices while it is being charged?
A: Yes.

Q9: Can GOOLOO® GP37 charges other devices while starting a car?
A: No.

Q10: If there is no response when pressing the switch button of GOOLOO® GP37, how can I do?
A: Maybe it is cause by low voltage protection Plug the adaptor into the 15V/1A input port to activate.

11

Q11: How long the storage of battery will remain?
A: 6-12 months, however, we suggest to recharge it every 3 months.

Toxic and Harmful Substacnes

Composition and amount of toxic or harmful substance in GP37

Pb	Hg	Cd	Cr(VI)	PBB	PBDE
0	0	0	0	0	0

Indicate that the content of harmful substances in all homogeneous materials is all lower than the prescribed limit of MCV (the standard 2002/95/EC/RoHs)

12

Attention

Do Not Submerge In Water

Do Not Disassemble

Do Not Dropping

Advoid Extreme Temperatures

Do Not Place Near or Into Fire

Overcharge/discharge Protection   Fuse Protection   Against-reverse Plug

Applied Standard: GB/T 18278-2000
